## University of Arizona Degree Search Major Exploration

### COMING SOON...

- ★ Hover capabilities that will provide course descriptions for every course in the four-year plan.
- ★ Transfer course equivalencies from every community college in the State of Arizona
- ★ Career Planning information related to every major including job prospects, potential positions, and salary ranges
- ★ Advising Contact Information for every major. (May 2012)

Degree Search is a new website that has revolutionized the ways in which students, parents, advisors, and high school counselors can explore majors at the University of Arizona. Degree Search is designed to provide a transparent view of the curriculum in a dynamic and user-friendly format that will allow explorers to see a clear picture of the curriculum, the rigor of foundation second language and Mathematics requirements along with

search mechanisms based on the Strong Interest Inventory (Self Exploration) and disciplinary search filters (Major Exploration.) Explorers will also be able to glean information about the majors in a trading card format, and within each trading card is more information about the major, a four-year plan, in-state transfer course equivalencies, and career planning information.
