

Feb. 8-10, 2015
Chicago, Illinois

A Taste of the Industry

The AFA Food Institute, held annually in February, brings 75 talented college men and women to the Chicago area to take part in a three-day program. Students are selected through a competitive application process and have expressed a specific interest in the food sector. The itinerary will provide interaction between students and food sector leaders; expose students to area processors, businesses and other related service providers and include discussion and training to enhance student preparation to enter careers in the agriculture and food industry.
