

SUMMER 2016

COSTA RICA

ENERGY, WATER, & HEALTH

*In these complex times, how do we make meaningful contributions to our communities?
How can we grow individually and together, caring for ourselves, and sustaining energy for change?*

The Costa Rica Energy, Water and Health service learning program will explore these and other centering questions in the context of studying energy production, water conservation, and community health in a rural Costa Rican community.

To learn more, come to an informal informational gathering:

December 4th, 12-1 p.m.
ENR2 room S107
(snacks provided)

The program is jointly sponsored by the School of Natural Resources and the Environment, College of Medicine, and Office of Global Initiatives.
