

WFSC 385: Zoo & Aquarium Conservation

A new 3 credit lecture course on the key role that zoos & aquariums play in conservation...

We will address the importance of zoos & aquariums in conservation and the opportunities for collaboration:

What are the challenges with captive breeding?

What are the considerations that are incorporated into designing effective zoo & aquarium habitats?

How do zoos & aquariums contribute to conservation in the wild?

The details...

Fall 2016: T & Th 12:30-1:45 pm
