

Tier I INDV Course for Fall 2018

AREC 150C Sustaining Life: The Global Economy of Food

Professor Anna Josephson
aljosephson@email.arizona.edu

Tues/Thurs 3:30-4:45, CHEM 134

Sample Class Topics:

- Trends in Food Demand
- What Makes Food Production Unique
- The Food Supply Chain
- Project Evaluation
- Food Production and the Environment
- Global Food Markets
- Governing the Global Food System

Successful students will be able to (1) discuss the changing market forces in the food industry, (2) describe the economic behavior of buyers and sellers in the food system, (3) analyze food niches, trends, bandwagons, brands and myths, and (4) evaluate the complex value-added food chain in the global food system.
