

# Everyone eats!

With an additional 2 billion people on earth,  
what is the future of our food supply?

## AED150C

### Food, Fiber and Natural Resources

Spring 2019 AED150C 3 Credits MW 2:00-3:15  
Saguaro #104

General Education Requirement for Individuals  
and Society

#### Key Topics:

- Role of Agriculture in Society
- Policies in Ag
- Impact of Biotechnology
- GMO's
- Water Conservation
- Agricultural Issues
- Food Security for your Future

Students will explore American agriculture, specifically the food, fiber, and natural resources industries. Students will be able to identify and describe essential aspects of each industry and apply learned knowledge to present day agriculture in order to make informed decisions as consumers of agriculture. The course is designed for students with limited agricultural knowledge who wish to expand their knowledge base in this field of study.
