

Enable Remote Desktop on your work PC

Prerequisites:

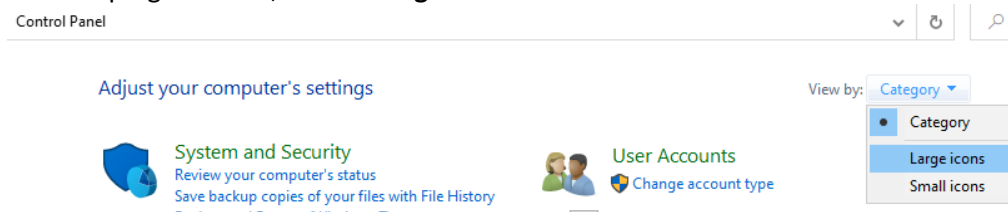

- Admin access on your work computer

Steps:

1. Click the Start button and type Control Panel and select it from the list

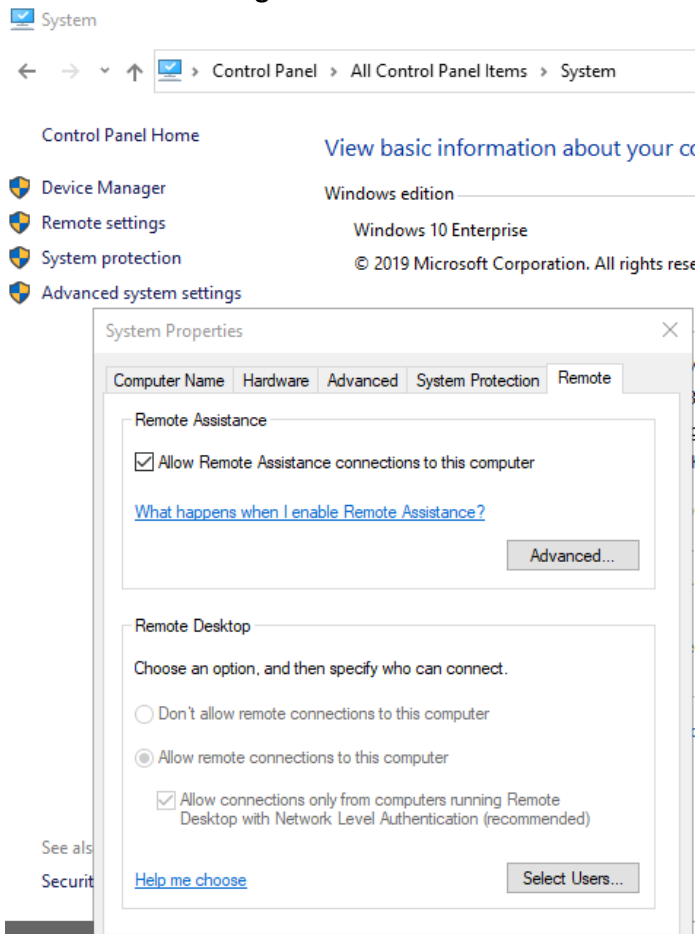

2. In the top right corner, choose **Large Icons** or **Small Icons**

3. Select **System** from the list

4. Select **Remote settings**

5. If the option for **Allow remote connections to this computer** is selected, you're done
6. If this option is not selected, please select it and click **Apply** and then click **OK**
