

# The Biological and Biomedical Joint Seminar Series

(Hosted by the departments of Molecular & Cellular Biology, Chemistry & Biochemistry, Cellular & Molecular Medicine, and Plant Sciences)

*“Towards more inclusive active learning classrooms: How groups of students are differentially impacted by active learning”*

**Sara Brownell, PhD**

Associate Professor  
School of Life Sciences  
Arizona State University

Tuesday February 16<sup>th</sup>, 2021  
Zoom Meeting @ IIAM

Hosted By: Molly Bolger (MCB)

Increasingly, college STEM courses are transitioning from traditional lecture to active learning because this way of teaching enhances student learning. However, active learning changes the dynamics of the classroom in ways that could create novel challenges for students with marginalized identities. In this talk, I will describe challenges for LGBTQ+ students and students with anxiety in active learning. I will also present ways for instructors to help build relationships in the classroom to help make active learning more inclusive for all students.
