

Plant Population Ecology

Ecol 496J/596J

Fall 2017

© Biological Photo Service

- We will cover population dynamics, intra- and interspecific competitive, predatory and mutualistic interactions and community dynamics with an emphasis on empirical research. The format will be a combination of lectures and student presentation/discussions.
- The course will meet Wednesdays from 10:00AM – 12:00PM.
- It is available for 1-3 credits, for graduate students and undergraduates with some background in ecology, evolution and plant biology.
- For more information call Larry Venable 621-5956 or venable@email.arizona.edu
