

CHILD COGNITION LAB

help us discover how children learn!

FUN FOR ALL AGES

Did you know?

- By 2 months, infants recognize their own name.
- By 6 months, infants understand many words like hands, feet, mommy, and daddy.
- That naps are still important for helping your 3-year-old remember, even if they no longer nap.
- That talking a lot to your child as a baby translates into better language skills in preschool and beyond.

The Child Cognition Lab brings these important discoveries to you courtesy of science. Please consider volunteering 30 or 60 minutes of your time to participate in our studies with your child!

If you are interested in hearing more, call us at 520-626-0278 or visit our website at childcognitionlab.arizona.edu.
