

Company Description

SENSEI is here to guide you towards greater wellbeing. Founded by Dr. David Agus and Larry Ellison, our ecosystem of products and experiences is designed with one intention: to empower you to grow well. What guides us is a belief that knowledge is the greatest tool in health, and that technology allows us to unlock deeper insights.

We are starting with food by building hydroponic farms to sustainably grow fruits and vegetables with a focus on nutrition. From Black Trifele tomatoes to Komatsuna mustard greens – every seed we plant has a purpose and a story.

Evidence-led, radically transparent, always enriching.

Job Description

SENSEI Farms is seeking an experienced, talented, and motivated Head Grower for our farm operations in Hawaii. This position will manage a large-scale state-of-the-art fruit and vegetable hydroponic farm operation. The Head Grower will perform all tasks related to the management of the hydroponic system and greenhouse facility, protocols, requirements for all crops produced including propagation, growing, pest and disease and nutritional management; harvesting; ensure all food safety protocols have been implemented; packaging; and postharvest handling and storage of the produce.

Experience

- Education and experience in either Agronomy, Horticulture, Plant Pathology, Entomology, Plant Science, or closely related field
- Minimum of 3-5 years of direct growing experience in commercial hydroponics/aquaponics producing a variety of fruits and vegetables, using advanced growing techniques and modern equipment (software and automated processes is preferred)
- Experience in monitoring and optimizing the growing conditions and nutritional requirements that is best for each crop being produced at all growth stages

Responsibilities

- Manage growing in a large-scale, commercial hydroponic facilities
- Work with a management and research team to maintain organization and control of the hydroponic growing software and operation
- Manage seeding, pest control, plant health, harvesting, etc.
- Ensure product quality and yields are achieved.
- Oversee cleanliness, sanitation and organization of all equipment present within the facility
