

# CALL FOR ABSTRACTS

## Innovations Connecting Complex Biosystems From Cells to Ecosystems

We proudly announce that registration is now open for the 2022 UIUC Plant Sciences In-person Symposium on **September 16<sup>th</sup>** from 8:30 AM to 4:30 PM. We are currently seeking abstracts for two 15-minute graduate student talks. If chosen, students will receive travel and financial support to speak at UIUC! Register at <http://symposium.cropsciences.illinois.edu/>.

Both undergraduate and graduate students can also apply for our poster competition. All posters are automatically entered into a poster competition where cash prizes will be presented to the best posters. Please limit submissions to one abstract for each primary author. **ABSTRACTS ARE DUE AUGUST 12<sup>TH</sup>, 11:59 PM.** This year's symposium theme is **"Innovations Connecting Complex Biosystems: From Cells to Ecosystems."** This year the University of Illinois Plant Science Symposium intends to explore the latest innovations connecting different biological systems. We are looking to showcase researchers and leaders connecting different types of biological and ecological data, combining different -omics data, comparative genetics and genomics, layering environmental data, and many more applications.
