

**Crop Science and Production**  
**Plant Sciences (PLS) 306**

**3 Credit Hours**  
**Fall 2012**

Crop Science and Production (PL S 306) will be offered on the UA campus on Fridays 12:00 to 2:50 p.m. in Marley 230 and will be delivered as a live-interactive course to the Central Arizona College and Arizona Western College campuses. Several field trips will also be conducted on Friday afternoons. The course involves an introduction to the basic principles and practices of crop management. Many examples and applications are provided for irrigated systems in arid and semiarid conditions.

**Course Objective**

Develop an understanding of the basic principles associated with crop production systems. Fundamental agronomic crop and soil science) concepts and practices will be presented to a broad range of plant production systems.
