

Plant Propagation, Production & Management

PLS 330 (4 credits)

Dr. Tanya Quist and Dr. Ursula Schuch

Fall 2013

Lectures:

- T/Th 11:00am-12:30pm

Lab:

- T 1:00pm-4:00pm

This course covers comprehensive plant wholesale production systems from propagation through operations to salable horticultural crops, including trees, shrubs, succulents and herbaceous plants.

You will learn:

- Principal propagation techniques including seeds, cuttings, budding and grafting.
- Sustainable cultural practices and environmental controls in horticultural crop production and marketing.
- Planning, resource allocation and development of a nursery growing operation

Recommended pre-requisites: PLS240, SWES200
