

Tanimura & Antle

Greenhouse Management Training Program

Entry Level Position

- Position available immediately
- Requires minimum BS in Ag Sciences or equivalent coursework
- Working Knowledge:
 - Plant Growth
 - Plant Nutrition
 - Pest Management
 - Plant Physiology
 - Post-Harvest Physiology
 - Plant Genetics
 - Greenhouse Systems
 - Food Safety

Successful candidates will begin the 2 year Management Training Program with a 120 day Orientation/Skills Development Program at Tanimura & Antle's California & Arizona Agricultural Operations before assignment to Tanimura & Antle's Livingston, Tennessee Hydroponic Greenhouse Operations. At Livingston, the candidate will receive on the job training and experience in all aspects of the Greenhouse Operations. During this training period, the candidate will perform trials and analysis and will be expected to present their findings to Management for process improvement.

Upon successful completion of Tanimura & Antle's Greenhouse Management Training Program, the candidate can expect to be placed into a management role suited to the candidate's skills. This could be a role at the existing Greenhouse, a management role at a future expansion greenhouse or within Tanimura & Antle's California/Arizona Operations.
