To: Turfgrass Faculty

From: Kimberly Erusha, Ph.D.  
Managing Director  
USGA Green Section

Subject: New Green Section Internship Opportunities for 2016

The USGA is pleased to offer paid internship opportunities for turfgrass management students to experience agronomic and resource management programs actively managed through the USGA Green Section Department.

The 2016 internship program has expanded to offer two types of opportunities occurring between the months of May and August:

- 1) One student will be selected for a three month Green Section Education Internship focusing on the content-related and administrative responsibilities of the department's education and outreach program.
- 2) Fourteen to sixteen students will have the opportunity to travel with Green Section agronomists on Course Consulting Service visits for one week.

We believe that both of these experiences with our staff can broaden students' perspectives of the turfgrass industry and the directions they take with their educational endeavors and career paths.

Attached are descriptions of the programs explaining how to proceed in nominating a candidate from your institution and the application process. ***Applications will be accepted through January 15, 2016.***

Don't let your students miss out on these unique internship opportunities. If you have any questions, please contact me at (908) 234-2300 or one of the USGA's regional agronomists in your area.
