

## Grower/Greenhouse Manager

Advanced Mid-Atlantic greenhouse operation is looking for experienced growers with knowledge of hydroponics. This individual will work with a team of successful, experienced growers in a large scale commercial growing operation. As a controlled environment agricultural facility, this greenhouse operates year round to produce crops that are sold to retail and food service customers.

We are seeking someone that is passionate about the advancement of technology in agriculture and is looking to make an impact in a growing organization where personal opportunities abound. Supportive working environment where thought growth is encouraged and where application to real world situations is rewarded.

Duties to include:

- Report to Head Grower
- Supervise and support production staff in areas of seeding, transplanting, harvesting, packing
- Daily crop and product review and analysis
- Manage fertigation system and fertilizers
- Maintain environmental conditions through sophisticated control system tools
- Manage facility production with an ERP
- Maintain logs of all greenhouse operations
- Ensure stringent food safety requirements
- Maintain operational documentation

Requirements

- 2-6 years of growing experience {large scale growing / commercial growing / lettuce / leafy greens and herbs }
- Knowledge of hydroponics a plus
- Knowledge of Organic growing a plus
- Knowledge of greenhouse design and operations a plus
- Knowledge of produce packing and processing methodology a plus
- Knowledge of USDA and FDA food safety regulations a plus
- Experience with writing and maintaining protocols and manuals
- Knowledge of Environmental controls system is required-knowledge of Priva a plus
- Good oral and written language skills {English a requirement-Spanish a large plus}
- Must have a valid driver licenses
- Bachelor's degree (Master's degree a plus) or equivalent work experience

Compensation commiserate with experience and qualifications-including benefits and relocation allowance
