TRAUMATIC STRESS STUDY

EXPERIENCING PTSD OR "TRAUMATIC STRESS"?

The SCAN Lab is conducting a study at the University of Arizona to observe how a six-week course of light exposure influences the brain and sleep patterns in people living with traumatic stress.

Are you eligible?

- Ages 18 - 50
- Experienced traumatic stress or diagnosed with PTSD in the last 10 years
- Right-handed
- English as primary language
- No metal objects in body

Eligible participants will receive up to $1200 for completion of all study activities

An Institutional Review Board responsible for human subjects research at The University of Arizona reviewed this research project and found it to be acceptable, according to applicable state and federal regulations and University policies designed to protect the rights and welfare of participants in research.
