

Plant Breeding and Genetics

PLS 415

Dr. Duke Pauli

Lecture: MWF 2-2:50

Spring 2019

- 
- Develop an understanding of the principals of plant improvement.
 - Learn how to select, advance, and develop new plant varieties.
 - Gain insight into new and emerging technologies like genomics and phenomics and how they are changing the foods you eat.
 - Study how the principals of selection have shaped agriculture throughout human history.
