

ANTH 469: ETHNOBOTANY  
Spring 2019  
TR 12:30-1:45pm Haury 215  
Instructor: Diane Austin

Ethnobotany is the study of the relationships between people and plants from the distant past to the present, focusing on the role of culture as the mediator in these relationships.

Ethnobotanists draw upon all subfields of anthropology to explore: Origins and Early Development of Agriculture, Industrialized Agriculture, Seed Saving, Food Security, Intellectual Property Rights, Plants and Medicine, Biodiversity and Conservation, and more...

Come explore Ethnobotany and its relevance today!
