

Propagation Mission Statement

The purpose of the Propagation Committee is to provide the **main funding source** for the Master Gardener Program's General Fund. We propagate the plants for the Spring and Fall Plant Sales, thus generating the money to fund and support all Master Gardener projects throughout the garden.

We strive to provide both interesting and novel plants, as well as southwest natives for the sales. We also endeavor to educate the public on proper UofA sanctioned plant propagation techniques, as well as proper care and maintenance of the plants. We do this at special outreach events such as our plant sales, home tours, classes, etc.

Propagation Committee Member Duties and Responsibilities

Regularly attend our work Thursdays. Let the Chairs know if you can't attend as far ahead as possible so we can better schedule our work days. Work under the direction of the Chairs. Learn and apply proper UofA sanctioned propagation techniques. Familiarize yourself with all the different job duties within the propagation area and rotate responsibilities as needed. Learn as much as possible about the plants we are growing. **Staff the plant sales.** If you have a suggestion about how we can improve what we are doing, please speak up because we all want to work smarter not harder. Work hard, learn a lot and try to have some fun along the way!
