GASL WEBINAR SERIES

ANIMAL WELFARE SUPPORTING SUSTAINABLE PRODUCTION

ANIMAL WELFARE ACTION NETWORK | REBECCA DOYLE

WEBINAR OBJECTIVE

This webinar focuses on two of the major global challenges facing livestock in the future:

sustainable production and **antimicrobial use**. Animal welfare has a key role to play in addressing both of these challenges. We will hear from experts in the field, science and policy on how animal welfare can and should be used as a means to tackle these global challenges. Talks will include on-ground and policy-level actions.

AUDIENCE

This webinar has been designed for those whose work focuses on animal production and management, but not necessarily with an animal welfare focus.

INFORMATION

WEBINAR CONTENT

The webinar will include interviews with experts in sustainable production and antimicrobial use. We will hear important panelists from different sectors, including the public sector represented by the European Commission's Head of Unit for Animal Welfare and Antimicrobial Use, debating on how animal welfare can be used to contribute solving these two complex global challenges.

DATE - TIME - DURATION - CONNECTION DETAILS

1 pm – 3 pm GMT; Wednesday, 27th January 2021

ACTION NETWORK BACKGROUND

GASL's Animal Welfare Action Network (AWAN) is a group of research, industry and non-government organizations with an interest in animal welfare. The work of AWAN focuses on advocating for, and demonstrating, the role that animal welfare plays in sustainable animal production, management, and the SDGs.

OPPORTUNITIES OF COLLABORATION

AWAN always welcomes new members and collaborations. Please get in touch via **EMAIL** if you'd like to learn more: rebecca.doyle@unimelb.edu.au
