

POST-DOCTORAL PLANT ECOLOGIST/RANGELAND SCIENTIST

USDA - Agricultural Research Service

Position Title, Series and Grade:

Research Ecologist 408 or Research Rangeland Management Specialist 454, GS-11

Salary Range:

\$58,562.00 to 76,131.00 per year

Duties:

The incumbent will work collaboratively with other scientists to investigate the effects of disturbances in sagebrush steppe ecosystems. This may include conducting research investigating the effects of livestock grazing on fire risk and behavior and post-fire plant community recovery. Duties will also include publishing research results in peer-reviewed scientific journals.

Qualifications:

Applicants MUST BE A CITIZEN of the United State of America. A recent Ph.D. in plant community ecology, rangeland science, or close related field is required. Experience conducting plant community research is required. Ability to publish research in peer-reviewed scientific journals is required. Experience conducting disturbance research is desired, but not required.

LOCATION

The incumbent will be station at the Eastern Oregon Agricultural Research Center in Burns, OR.

START DATE:

Fall 2015/Winter 2016

OPEN PERIOD:

Position will be open until a viable candidate is hired (Fall 2015)

To Apply:

Email Dr. Kirk Davies the following: cover letter, resume/CV, one page abstract of Ph.D. dissertation, and university transcripts.
