ATTENTION FACULTY, POSTDOCS, & GRAD STUDENTS!

Set yourself apart with new technical and open collaboration skills that funders, research labs, and educational institutions demand.

CyVerse and the UA Data Science Institute presents **Foundational Open Science Skills Online** as both a curriculum and a roadmap to guide your computational research and level up your teaching, training, collaborating, proposal writing, and publishing.

FREE for UA faculty, staff, postdocs, and graduate students of all skill levels.

FOSS Online offers hands-on learning resources to build a solid Open Science foundation for your research and educational projects, in a collaborative, supportive atmosphere with peers and project mentors.

LEVEL UP YOUR SKILLS!
